

GQ Automate

Transforming Challenges into Triumphs

GQ

GQsystems brings over a decade of experience helping companies improve, grow, and overcome complex challenges.

From Analysis to Action

GQ Automate Consulting serves as a trusted advisor between clients and automation vendors. We help define precise project scopes, refine solution designs, and ensure that automation investments lead to measurable results – without costly missteps.

Automation starts with the right decision.

Industrial automation

Manufacturing process automation uses technology to control and perform production tasks with minimal human input. It boosts efficiency, accuracy, and reduces costs.

from vision to results

Why us?

With GQ Automate, you gain a partner who helps you understand what you truly need and guides you through every step — **from analysis to implementation.**

We provide **two** primary solutions in the area of automation

Consulting services

Project implementation

Why automation fails?

Many companies strive to reduce costs, but without a well-defined scope, automation projects are at high risk of failure.

The hidden risks behind automation projects:

- **Unclear objectives and project framework**
No clear understanding of what's truly needed
- **Misjudged Budget**
miscalculated costs, space, or line capabilities
- **Lack of internal capacity**
missing time, expertise, or dedicated people
- **Trusting the first vendor**
relying on the supplier's first proposal without validation

At GQ, we provide strategic value by clarifying true business needs, uncovering hidden risks, and ensuring your investment delivers measurable, real impact.

GQ – The Expert on your side

Phase 1: PRE-PROJECT alignment

Our “Pre-Project” phase helps you take control before the project even starts.

Our 3+1 steps to success

- **On-Site visit**
our experts visit your facility (1–2 days)
- **Input collection**
collecting key insights about your issues and objectives
- **Pre-Analysis**
we find weak points and unlock potential
- **Tailored proposal**
you receive a clear next-step recommendation aligned with your business goals

Consulting services

- **Assessment of current automation status**

analysis of automation levels in manufacturing plants, automated lines, workstations, and machinery.

- **Pre-project planning and feasibility studies for new automation initiatives**

2D & 3D conceptual studies, spatial planning, and impact assessment on existing processes.

- **Risk management and analysis**

risk assessments for existing or planned equipment and systems

- **Development of technical specifications and requirements for new automation deliveries in the areas of:**

- robotics
- automated production lines
- process reorganization
- special-purpose machines and workstations

● **Support and controlling throughout the entire automation project lifecycle**

- **development phase**
robotic simulations, PLC program structure and status checks, risk assessments and design FMEAs
- special-purpose machines and workstations – manufacturing control
- tuning of production processes and status checks of equipment
- documentation review & functional analyses
- start-up assistance

● **Review and negotiation of supplier cost increases**

● **Expert engineering support**

technical involvement and oversight in all engineering-related tasks.

Project implementation

- mechanical design and development of machines, automated lines, and robotic workstations
- robotic simulations & studies
- PLC programming
- documentation aligned with legislation and specific client requirements
- manufacturing & assembly of automation equipment
 - delivered as turnkey solution
- commissioning & start-up, including ramp-up assistance
- upgrades & adjustments of existing equipment
